

SCULLY THE SKELETON 🦴

Skully was born in France 1864.

He was a normal 11 year old boy who enjoyed going out for bike rides and spending time with his family.

Skully lived with his mum, dad and 2 older brothers. One day Skully was riding his bike and he was encountered by a mysterious figure walking towards him.

The figure started running towards Skully, so Skully started running away but it was too late the figure had attacked Skully!

Skully felt lightheaded and sick; he could only see a blur of a bony outline but he was too dizzy and fell down onto the concrete.

Skully awoke that next day sore and confused, he didn't remember clearly what had happened yesterday but he knew something was up. Skully ran with a limp straight to his home and looked in the mirror...
